

IMPORTANT!!!

DO NOT REPLACE INJECTORS, DPF OR EGR VALVES UNTIL YOU TRY FORTÉ

I've been using Forté products for over two years now. I use Diesel Booster at 400 to 1 in summer fuel. I increase the ratio to 300 to 1 in winter and I have power and fuel economy as if I was running summer fuel. I also use Pre-Lube every 50,000 kms, to clean the existing oil deposits, and I keep Fusion in my oil all of the time. The Fusion gives me additional wear protection and lowers the pour-point in extreme cold weather. I found out how effective Fusion is at lowering the pour-point when I was in William's Lake last December. Normally, my 1990 Kenworth, 425 Cat sits in my heated shop at home.

But on this particular trip it was left outside for four days at -25°C. I jumped in expecting it not to start. I was surprised when it started without ether, which I attribute to the higher cetane in Diesel Booster. But what really amazed me was how easily the engine turned over. I looked at my oil pressure as it was cranking and noticed I had 20 lbs of oil pressure. Normally, before using Fusion, I would not see the oil pressure gauge move until well after the engine is running. At -25°C, in 15W40 oil, I had 20 lbs of oil pressure at crank. I'll say it again, where was this stuff 30 years ago?

- Arden Wiebe, Great Pacific Industries

FORTÉ ULS DIESEL BOOSTER *Reduces friction, boosts cetane and eliminates engine deposits.*

AVAILABLE AT THESE HUSKY TRUCK STOPS:

BLUE RIVER, BC • HWY 5 S
OSOYOOS, BC • 9206 – 97 Street
PRINCE GEORGE, BC • Pacific Street
WILLIAM'S LAKE, BC • 1335 Caribou HWY 97 S
CACHE CREEK, BC • 959 S. Trans Canada HWY
GOLDEN, BC • 1050 #1 HWY
